DETAILED ACTION

REASONS FOR ALLOWANCE

-- The allowed claims are 1-20.

The following is an examiner's statement of reasons for allowance:

-- The following is a statement of reasons for the indication of allowable subject matter for the listed claims:

Claim 1: The prior art does not show the lateral busbars being connected to at least two longitudinal busbars crossing the longitudinal busbars at right angles, the branch terminals of the longitudinal busbars and the branch terminals of the lateral busbars are arranged in line with the connector-fitting chambers for connecting with connectors of the wiring harness.

Claims 3 and 8: The prior art does not show the unique structure of a concave groove is formed in a partition wall of the connector fitting chamber, the cover includes a plurality of ribs against each of which an end of each pair of the clip terminals abuts and an inclined shaped guide surface on the inlet of the groove.

This in combination with all the other elements pertaining to each of the above mentioned claims are reasons for allowable subject matter and the examiner knows of no permissible motivation to combine the prior art such that the subject matter as a whole would have been obvious at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior listed on PTO form 892 that is made of record is considered pertinent to applicant's disclosure because it shows the state of the art with respect to applicant's claimed invention.
